Key Areas Explored in D.J. Harris's "Cases and Materials on International Law"

While the specific contents may vary slightly between editions, the core areas consistently covered in Harris's seminal work provide a solid foundation in international law:

The Foundations of International Law

Before diving into specific doctrines, Harris typically sets the stage by exploring the very nature of international law. This includes discussions on:

1. The sources of international law (treaties, customary international law, general principles of law, judicial decisions, and scholarly writings – Articles 38(1) of the ICJ Statute being a key reference).
2. The relationship between international law and domestic law (monism vs. dualism).
3. The historical development of the international legal system.
4. The concept of statehood and recognition.

Understanding these foundational elements is crucial for appreciating how the international legal order functions and the actors within it.

Statehood, Sovereignty, and Jurisdiction

These are arguably the most fundamental concepts in international law, and Harris dedicates significant attention to them. You'll find extensive case studies and analysis on:

1. The criteria for statehood (territory, population, government, capacity to enter into relations with other states).
2. The principle of state sovereignty and its limitations.
3. Jurisdiction – territorial, extraterritorial, and the immunities of states and their representatives.
4. The contentious issue of state succession.

These topics are often illustrated through cases involving territorial disputes, diplomatic relations, and acts of state. The ebook format makes it incredibly easy to cross-reference these interconnected concepts.

International Personality and Actors

While states are the primary subjects of international law, Harris also explores the evolving role of other actors:

1. International organizations (like the United Nations, its specialized agencies, and regional bodies), their legal status, powers, and responsibilities.
2. The growing importance of individuals and their rights in international law.
3. The role of non-governmental organizations (NGOs) and multinational corporations.

Discussions here often involve seminal cases on the legal personality of international organizations, such as the Reparation for Injuries case concerning the UN.

The Law of Treaties

Treaties are a primary source of international law and a critical tool for international cooperation. Harris's treatment of treaty law typically covers:

1. The conclusion, entry into force, and registration of treaties.

2. Reservations to treaties.
3. Interpretation of treaty provisions.
4. The validity, termination, and suspension of treaties.

Key cases illustrating these principles, such as those concerning the Vienna Convention on the Law of Treaties, are essential reading.

The Use of Force and International Peace and Security

This is a highly debated and critically important area of international law. Harris meticulously examines:

1. The prohibition on the use of force in international relations (Article 2(4) of the UN Charter).
2. The exceptions to this prohibition, notably self-defense.
3. The role of the UN Security Council in maintaining international peace and security.
4. The concept of humanitarian intervention and its legal basis.

Landmark cases and advisory opinions from the International Court of Justice (ICJ) are frequently used to illustrate the complexities of these issues.

International Dispute Settlement

How are international disputes resolved? Harris's book explores the various mechanisms available:

1. Diplomatic means of dispute settlement (negotiation, mediation, conciliation).
2. Judicial settlement, focusing on the jurisdiction and procedure of international courts and tribunals, with a particular emphasis on the ICJ.
3. Arbitration as a consensual form of dispute resolution.

The ebook makes it simple to navigate between the principles of dispute settlement and the specific jurisprudence of bodies like the ICJ or the International Criminal Court (ICC).

International Criminal Law

With the rise of international criminal tribunals, this area has gained immense prominence. Harris’s work often includes materials on:

1. The definition and prosecution of international crimes (genocide, war crimes, crimes against humanity, the crime of aggression).
2. The jurisdiction of international criminal tribunals (e.g., ICC, ad hoc tribunals for the former Yugoslavia and Rwanda).
3. Issues of individual criminal responsibility in international law.

Cases involving prominent international war criminals offer stark examples of the application of these principles.

International Human Rights Law
