The Transformation: Medical School Education

Once accepted, the journey of *becoming a physician* truly accelerates within the walls of medical school. Medical school is typically a four-year program, divided into two phases:

Phase 1: The Foundational Sciences (Years 1-2)

The first two years are largely dedicated to the foundational sciences. Bonner Thomas Neville would spend these years immersed in subjects like: * **Anatomy:** The study of the structure of the human body. * **Physiology:** The study of how the human body functions. * **Biochemistry:** The study of the chemical processes within living organisms. * **Pathology:** The study of disease, its causes, and its effects. * **Pharmacology:** The study of drugs and their uses. * **Microbiology:** The study of microscopic organisms, including bacteria and viruses. * **Immunology:** The study of the immune system. This phase is heavy on lectures, laboratory work, and textbooks. It's about building a deep understanding of the fundamental principles that underpin human health and disease. Medical students also begin to develop their clinical reasoning skills through case studies and early patient interactions.

Phase 2: Clinical Rotations and Clerkships (Years 3-4)

The latter two years of medical school shift the focus to clinical application. Bonner would embark on a series of rotations, also known as clerkships, where he would gain practical experience in various medical specialties. These rotations typically include: * **Internal Medicine:** Focusing on the diagnosis and treatment of adult diseases. * **Pediatrics:** Caring for infants, children, and adolescents. * **Surgery:** Gaining experience in surgical procedures and patient management. * **Obstetrics and Gynecology:** Caring for women's reproductive health and childbirth. * **Psychiatry:** Understanding and treating mental health disorders. * **Neurology:** Diagnosing and managing disorders of the nervous system. * **Family Medicine:** Providing comprehensive healthcare to individuals and families across all ages.
