Key precautions include ensuring the mower is properly attached to the tractor, checking for bystanders and animals, understanding PTO speed requirements, and being aware of the cutting area. Wear appropriate personal protective equipment (PPE) like safety glasses and hearing protection.

3	How do I properly adjust the cutting height on a Kuhn GMD 902 disc mower?	The operator manual will detail the specific adjustment mechanism. Generally, this involves adjusting the skids or spacers on each cutterbar. Consult the manual for precise instructions on the number and position of shims or adjustment bolts required for your desired cutting height.
4	What maintenance tasks are crucial for the longevity of my Kuhn GMD 902 disc mower, as outlined in the operator manual?	The manual emphasizes regular lubrication of all grease points, inspection and tightening of bolts and fasteners, checking and, if necessary, replacing cutterbar knives, and ensuring the drive system is clean and properly lubricated. Routine visual inspections for wear and damage are also vital.
5	My Kuhn GMD 902 disc mower is experiencing uneven cutting. What does the operator manual suggest for troubleshooting?	Uneven cutting can be caused by dull or worn knives, improper cutting height adjustment, or an unbalanced cutterbar. The manual will guide you through checking knife sharpness and wear, verifying cutting height consistency across the mower, and ensuring the cutterbar is level and free from obstructions.
6	What are the recommended lubrication points and intervals for the Kuhn GMD 902 disc mower according to the operator manual?	The operator manual provides a detailed diagram of all lubrication points, typically including PTO shafts, gearboxes, and pivot points.
