Understanding EPUB Format

EPUB, or Electronic Publication, is an open standard format for digital books. It is designed to be highly versatile, adapting to different screen sizes and reader preferences. Unlike PDF, which is primarily a fixed-layout document, EPUB is a reflowable format. This means the text adjusts to fit different devices and their displays, enhancing readability.

Format	Characteristics	Suitability
EPUB	Reflowable text, adaptable layouts, support for various media (images, audio).	Ideal for reading on e-readers, tablets, and smartphones.
PDF	Fixed layout, non-reflowable text, limited multimedia support.	Suitable for documents requiring precise page formatting (e.g., technical manuals).

EPUB files generally contain the text, images, and metadata (such as title, author, cover image) of a book. This format is particularly well-suited to digital consumption because it handles font sizing, page breaks, and text formatting dynamically, rather than rigidly.
