Who Sings "Here Comes the Sun"? The Story Behind That Iconic Beatles Anthem

The gentle, optimistic strum of an acoustic guitar, followed by a melody that feels like the first warm rays of sunshine breaking through after a long, gray spell – that's the magic of "Here Comes the Sun." It's a song that evokes feelings of hope, renewal, and pure joy. But when you hum along to this timeless classic, have you ever stopped to wonder, "Who sings 'Here Comes the Sun'?" The answer, as with so many beloved tunes from the era, points to the legendary Liverpool quartet: The Beatles.

While The Beatles are renowned for their collective genius and the distinctive vocal interplay between John Lennon and Paul McCartney, "Here Comes the Sun" is a special case. It's a song that, in many ways, represents the individual brilliance of one of its members, offering a glimpse into his songwriting process and his personal experiences. So, let's dive deep into the story of this iconic song, unraveling the layers of its creation, performance, and enduring legacy.

George Harrison: The Sunniest Songwriter in The Beatles

The primary singer and songwriter of "Here Comes the Sun" is none other than George Harrison. Often referred to as the "quiet Beatle," George was a prodigious talent who, though sometimes overshadowed by Lennon and McCartney's prolific output, penned some of The Beatles' most beloved and introspective songs. "Here Comes the Sun" is arguably his masterpiece, a testament to his evolving songwriting prowess and his spiritual journey.

By the late 1960s, George had been increasingly exploring Eastern philosophy and spirituality, particularly through his friendship with Ravi Shankar. This influence, combined with a growing weariness of the internal tensions and business dealings within The Beatles, found its expression in his songwriting. "Here Comes the Sun" emerged from a period of personal respite and artistic freedom.

The Genesis of a Sun-Kissed Melody

The inspiration behind "Here Comes the Sun" is beautifully straightforward. George Harrison wrote the song in the

spring of 1969 at the country home of his friend, Eric Clapton, in Surrey, England. The Beatles had recently returned from a tumultuous period of business meetings and the often-difficult recording sessions for the *Get Back* (later released as *Let It Be*) album.

Imagine the scene: the pressure cooker of Apple Corps, the infighting, the looming dissolution of the band. George, feeling the strain, found solace in the simple act of escaping to Clapton's garden. He recalled the moment in his autobiography, *I, Me, Mine*: " 'Here Comes the Sun' was written at a time when I was fed up with the office, fed up with all my business affairs. I went to Eric Clapton's house to get away from it all, and I took my guitar and went over to his garden. I sat on the grass and wrote the song, sitting on the grass, because it was just a beautiful day and I thought, 'Well, I'll go out and lie in the sun.'"

This direct connection to nature and the simple pleasure of a beautiful day served as the perfect antidote to the negativity George was experiencing. The song became a symbolic representation of breaking free, of finding light and hope after darkness.

The Beatles' Recording of "Here Comes the Sun"

Recorded for the monumental 1969 album *Abbey Road*, "Here Comes the Sun" showcases George Harrison at his songwriting and performing best. While John and Paul contribute vocally and instrumentally to many Beatles tracks, "Here Comes the Sun" is very much George's vehicle.

George Harrison on Lead Vocals and Guitar

George sings the lead vocals with a gentle, earnest delivery that perfectly captures the song's optimistic spirit. His acoustic guitar playing is the driving force, its bright, ringing chords instantly recognizable and incredibly uplifting. He also contributes an electric guitar solo that, while not flashy, is melodic and perfectly suited to the song's warm atmosphere. The distinctive tone of his Fender Stratocaster, often nicknamed "Rocky," can be heard here.

The Contributions of Other Beatles

While George is the undeniable star, the other Beatles played crucial roles in shaping the final sound:

1. **Paul McCartney** provides backing vocals and plays bass guitar. His harmonies, subtly woven into the chorus, add another layer of warmth and depth.
2. **Ringo Starr** lays down a solid, yet understated drum beat. His drumming on this track is supportive and rhythmic, enhancing the song's gentle momentum without overpowering it.
3. **John Lennon** was recovering from a car accident at the time and did not play on "Here Comes the Sun." However, his presence and the collective energy of the band were still integral to the *Abbey Road* sessions.

Orchestral Arrangements and Studio Magic

The production of "Here Comes the Sun" also features some subtle but effective studio additions. George Martin, The Beatles' trusted producer, arranged and conducted a string quartet (two violins, a viola, and a cello) that adds a lush, classical feel to the song's bridge and outro. This instrumental flourish elevates the emotional impact of the track, creating a sense of grandeur and release.

The use of Moog synthesizer, played by George himself, also adds a unique texture to the recording, particularly in the instrumental breaks. It's a subtle yet distinctive sound that became increasingly prevalent in The Beatles' later work.

George Harrison: The Sole Architect of a Luminous Melody

The simple, definitive answer to "who sings 'Here Comes the Sun'?" is **George Harrison**. It is his gentle, reflective vocals that carry the song's optimistic message. Harrison, often referred to as the "quiet Beatle," penned this masterpiece and took the lead vocal on the recording. This wasn't the first time Harrison had contributed significantly to a Beatles album; his songwriting had grown increasingly prominent throughout the band's career,

with notable tracks like "Something" and "While My Guitar Gently Weeps" showcasing his burgeoning talent. However, "Here Comes the Sun" stands out as one of his most personal and universally beloved compositions.

The Genesis of a Timeless Tune: Inspiration and Context

To truly understand who sings "Here Comes the Sun" and the depth of its performance, we must delve into the circumstances surrounding its creation. The song was written in the spring of 1969 at the country estate of his friend, Eric Clapton, in Surrey. At the time, The Beatles were experiencing considerable internal friction, particularly concerning business matters and the increasingly strained relationships within the band. The pressures of fame, financial disputes, and creative disagreements were taking their toll.

Harrison, feeling the weight of these anxieties, sought refuge and respite in Clapton's tranquil surroundings. He recalled the experience in his autobiography, "I Me Mine," stating, " 'Here Comes the Sun' was written at a time of great distress in The Beatles, and I went to stay at Eric Clapton's house. I was just a bit fed up with the whole thing, and I went out into the garden with one of Eric's acoustic guitars and sat round the back of his house. The sun came out of the clouds, and I wrote the song right there and then."

This personal context is crucial. The song isn't just a cheerful ditty; it's an expression of relief, a sigh of gratitude for a moment of peace amidst turmoil. The bright, optimistic melody and lyrics serve as a direct contrast to the darker themes that were beginning to permeate the band's professional and personal lives. Understanding this background enriches our appreciation for Harrison's vocal performance – it's not just a singer delivering a song, but a man finding solace and expressing it through his art.

The Abbey Road Sessions: A Collaborative Effort with a Singular Voice

While George Harrison is the primary vocalist on "Here Comes the Sun," the recording process for this track, like all Beatles songs, involved the contributions of his bandmates. The song was recorded at Abbey Road Studios during the sessions for the album *Abbey Road*, released in 1969. John Lennon, Paul McCartney, and Ringo Starr all played instrumental roles, even if their vocal contributions were minimal or absent from the final mix.

Ringo Starr provided the drumming, his steady rhythm providing a gentle pulse to the song. Paul McCartney played bass guitar, adding the melodic low-end that is characteristic of his playing. John Lennon, though recovering from a motorcycle accident at the time and not present for all the *Abbey Road* sessions, is credited with providing backing vocals. However, Harrison's lead vocal is front and center, carrying the narrative and emotional weight of the song.

The production of "Here Comes the Sun" was overseen by the legendary George Martin, often referred to as the "fifth Beatle." Martin's meticulous production work helped to shape the song's luminous soundscape. Notably, Harrison himself played acoustic guitar, lead guitar, and sang lead and backing vocals. The song also features a Moog synthesizer, played by Harrison, which adds a distinctive ethereal quality. The orchestral arrangement, a common feature on *Abbey Road*, was also contributed by Martin and Harrison, further enhancing the song's rich texture. This collaborative spirit, even with Harrison's clear dominance on vocals, is a hallmark of the Beatles' studio magic.

Beyond the Lead Vocal: Understanding the Beatles' Vocal Dynamics

When exploring "who sings 'Here Comes the Sun'," it's important to acknowledge the broader context of The Beatles' vocal dynamics. The band was renowned for its intricate vocal harmonies, often featuring the distinct voices of Lennon and McCartney trading leads or blending in powerful unison. On many of their biggest hits, such as "She Loves You," "I Want to Hold Your Hand," or "A Hard Day's Night," Lennon and McCartney's vocals are intertwined, creating their signature sound.

However, "Here Comes the Sun" deviates from this common pattern. It is, in essence, a George Harrison solo performance within the Beatles framework. This shift in vocal focus is significant. It highlights Harrison's growing confidence and his desire to express himself more directly through his songwriting and vocal delivery. While Lennon and McCartney were undoubtedly the primary songwriters and vocalists for much of the band's early and mid-career, Harrison's contributions became increasingly vital, particularly on albums like *The Beatles* (The White Album) and *Abbey Road*.

The decision to have Harrison sing lead on "Here Comes the Sun" was a deliberate choice that allowed his unique vocal timbre and emotional resonance to shine. His voice, though perhaps less powerful than Lennon's or McCartney's, possesses a warmth and sincerity that perfectly suits the song's gentle optimism. This choice underscores the collaborative nature of the band, where each member's strengths were recognized and utilized.

Their ability to preserve layout, structure, and formatting across devices makes them a trusted format worldwide. When working with Who Sings Here Comes The Sun in PDF format, understanding best practices ensures better usability, long-term accessibility, and an overall smoother experience for readers and professionals alike.

Unlike editable document formats, PDFs are designed to remain stable. Fonts, images, spacing, and page layouts stay consistent whether viewed on Windows, macOS, Linux, Android, or iOS. This reliability makes PDF an ideal choice for distributing structured content such as manuals, guides, ebooks, research papers, and instructional

resources like Who Sings Here Comes The Sun.

Why PDF is widely used for digital content

The popularity of PDF files is driven by their universal compatibility and ease of sharing. Most devices come with built-in PDF viewers, eliminating the need for specialized software. This allows users to access Who Sings Here Comes The Sun instantly without technical barriers. Additionally, PDFs support advanced features such as hyperlinks, bookmarks, embedded media, and interactive elements, making them versatile for many use cases.

Optimizing PDF readability for better user experience

Many PDF readers offer features such as continuous scrolling, dual-page view, and night mode. These options allow users to customize how they interact with Who Sings Here Comes The Sun based on their preferences and devices.

Clear typography and sufficient spacing also play an important role. Well-structured PDFs reduce eye strain and improve comprehension. On smaller screens, readers that support text reflow can adapt content dynamically, making Who Sings Here Comes The Sun easier to read without constant zooming or scrolling.
